

IMERY'S PERFORMANCE MINERALS

- FINE PARTICLE PROCESSING
- SCALE-UP SOLUTIONS
- TOLL PROCESSING
- NANOMATERIAL PRODUCTION SERVICE

PARTICLE PROCESSING SOLUTIONS

- Scale up Solutions;** Bridge the gap between your lab and full scale operations, use our facilities to develop your process, reducing cost and risk.
- Particle Processing;** Use our skills in particle processing to develop your products.
- Toll Processing;** Is your operation unable to make the volumes you need?

USE OUR FLEXIBLE FACILITIES TO MEET YOUR DEMAND

IMERYS PERFORMANCE MINERALS

- FINE PARTICLE PROCESSING
- SCALE-UP SOLUTIONS
- TOLL PROCESSING
- NANOMATERIAL PRODUCTION

PARTICLE PROCESSING SOLUTIONS

Take advantage of a powerful combination of particle processing techniques, testing and market knowledge.

IMERYS Performance Minerals have for many years used an extensive range of particle processing techniques to develop products for industrial applications. Our designated facility offers the possibility to manufacture your pilot trial sample, or product, in quantities from kilos to tonnes.

As well as an extensive range of processing techniques we have **state of the art characterisation and QC facilities**, allowing us to control materials at every stage of the process, from raw material testing, in-line analysis and final product characterisation.

IMERYS Performance Minerals are active across Europe in the plastics, rubber, paint, adhesives and chemicals markets. We have a highly qualified team of scientists with detailed knowledge of the market requirement - we can talk your language.

- From particle size selection, to surface treatment, ion-exchange, precipitation, purification, recovery and calcination, we are committed to provide products and services that consistently satisfy the expectations of our customers. Our process equipment can be optimised to ensure your sample or product is manufactured to a desired specification. Our quality management systems comply with ISO9001:2000.

- From electron microscopy, to spectroscopic, elemental and particle size analysis, our QC and characterisation laboratories are fully equipped and staffed to provide full support to your specific requirements.

- From polymer compounding to paint formulation, to blown-film production, our applications laboratories can transform your sample into end products to better understand the value proposition.
