

METASTAR[®] 501

Metakaolin for Pool Plaster

QUALITY MINERAL PRODUCTS ENRICHING OUR DAILY LIFE

METASTAR 501 is a premium metakaolin produced by very carefully controlled calcination. It has been engineered with a high level of pozzolanic reactivity when used in portland cement-based concrete, plaster, and mortar. METASTAR 501 can provide improved strength, durability, workability and plaster finish. It makes pool plaster creamier and easier to apply.

METASTAR 501 is a metakaolin pozzolanic additive that:

- ✓ *Improves strength, durability, and workability of portland cement concrete*
- ✓ *Makes portland cement easier to apply*
- ✓ *Provides smoother finish*
- ✓ *Has bright white color for white and color plasters*
- ✓ *Reduces permeability, efflorescence, and cracking*
- ✓ *Available in 50-pound bags*

METASTAR® 501

Metakaolin for Pool Plaster

Typical Values

Color	White
Mean Particle Size (microns)	1.2
Specific Gravity	2.5
pH	4 - 6
G.E. Brightness	86
Moisture (max. %)	1.0

METASTAR 501 is a pozzolanic mineral additive that can make your swimming pool plaster better by improving its strength, durability and workability. It makes pool plaster easier to apply and it provides smoother finishes.

The same mineral supplier that has been providing **POOL MIX®** high whiteness calcium carbonate for years now brings you high quality **METASTAR 501** metakaolin.

METASTAR 501 metakaolin can be purchased in full truckload quantities or it can be combined with your **POOL MIX** high whiteness calcium carbonate pallet shipments.

5-10% of METASTAR 501 is recommended in the white portland cement/POOL MIX batch
